'Green Germany' is a DAAD Lecture series organised by Duitsland Instituut Amsterdam and research group Environment & Society (UvA).

Contact & register: Krijn Thijs (k.thijs@uva.nl) & Mario Daniels (mdaniels@uva.nl)

About the speakers

Ruud van Dijk is senior lecturer in the History of International Relations at the University of Amsterdam. He focuses on the history of the Cold War, nuclear weapons in international politics, transatlantic relations, and how the so-called international system has related to climate change, and vice versa.

Einat Elazari is a PhD candidate at the European Forum of the Hebrew University of Jerusalem. Her research is focused on urban climate policies and the diverse policy tools cities employ to mitigate and adapt to climate change. She holds a master's degree in European Studies from Heinrich Heine University Düsseldorf in Germany. She has over 15 years of work as a researcher and policy advisor in various roles in different offices and firms in the public and private sectors.

Mathijs Eskes is historian, interested in Umweltgeschichte, German history and non-western history. He works as free lance researcher and text-editor in the Netherlands.

João H.S. Jung is Professor at the Pontifical Catholic University of Rio Grande do Sul (PUCRS) on the undergraduate course in International Relations and the postgraduate course in Philosophy. PhD in Philosophy from the University of Hagen in a double degree with PUCRS. PhD candidate in International Relations at the University of São Paulo (USP).

Victoria Maltchik - PhD candidate in environmental tax law at Pontifical Catholic University of Rio Grande do Sul (PUCRS). Researcher at Advanced Research Group in Tax Law (GTAX-PUCRS). She has worked at some of Brazil's leading law firms.

Steven de Rave is student in history and philosophy at UvA university, specialized in urban history and climate history.

Alexander van Veen studied history at the University of Amsterdam and currently is junior researcher at the DIA, working in a project on future mobility scenarios in Germany.
